DANGEROUS IMITATION OF MONEY.

Spurious One Dollar Found in Circulation by the Secret Service.

Notice that one of the most dangerous counterfeits of one dollar bills ever issued is in circulation have been sent out by John E. Wilkie, chief of the secret service. This is the first notice issued by the department regarding a new counterfeit in 1910.

The counterfeit is printed from retouched photomechanical plates on a good quality of bond paper, ink lines being used to imitate the silk fiber. The series is of 1890, the check letter is "C," the face plate number is 4,801. The number on the back is 2,568. The bill bears the fac simile signatures of W. T. Vernon, registrar of the treasury, and Charles H. Treat, treasurer of the United States, with portraits of Lincoln and Grant. The number is R9280452.

A close examination of the note reveals defects in the portraits of Lincoln and Grant, a distinct white patch. The periods after Charles H. Treat, being made to represent Grant's nose, over the "i" and after "Vernon" in the signature of the Registrar are omitted in the counterfeit. The small word "United" in the border of the note, immediately to the right of Grant's portrait is spelled "United." The counterfeit was found by C. A. Altamus, assistant cashier of the Chicago City Railway company, last week. Mrs. Wilkie estimates that thousands of the bills are in circulation.

Took All His Money.

Often all a man earns goes to doctors or for medicines, to cure a stomach, liver or kidney trouble that Dr. King's New Life Pills would quickly cure at slight cost. Best for dyspepsia, indigestion, biliousness, constipation, jaundice, malaria and debility. 25c at all dealers.

Kill the English Sparrows.

War has been declared by the secretary of agriculture at Washington upon the English sparrow, which, according to the department, among birds is comparable to the rat among mammals. With end in view, the department is circulating extensively a bulletin on how to destroy this "cunning, destructive and filthy bird." Except in the destruction of weed seed, there is nothing to be said in the sparrow's favor. On the other hand, it destroys cherries, grapes, pears, peaches, buds, flowers, vines, shrubs, garden seed and young vegetables, especially peas and lettuce. In addition, it usurps the nests and destroys the eggs of the robin, wren, mocking bird and other useful native specimens. The most effective way of preventing the increase of sparrows is the destruction of their nests at intervals of ten or twelve days.

Do you know that croup can be prevented? Give Chamberlain's Cough Remedy as soon as the child becomes hoarse or even after the croupy cough appears and it will prevent the attack. It is also a certain cure for croup and has never been known to fail. Sold by all dealers.

Household Hints.

To bake cabbage so that every one in the family will like it: First cook it tender in salted water, changing the water twice. Then chop it, put it into a buttered baking dish, turn a cupful of white sauce mixed with grated cheese over it, cover the top with buttered bread crumbs, and bake until the top is a delicate brown.

To can beef: Cook until tender so that the fibers will break apart. Season and cut into small pieces; boil the gravy until so thick it will jelly when cold. Discard all pieces of gristle and with a wooden masher press the meat, a little at a time, firmly into hot jars. Then pour in enough gravy to fill all the spaces around it—not enough to float the meat, but to cover it. Then add more meat and gravy until the jars are filled within an inch of the top, and see that there are no air
